Ornamental Features

Jazz Little Bluestem has masses of beautiful plumes of purple flowers with coppery-bronze overtones rising above the foliage in late summer, which are most effective when planted in groupings. Its attractive grassy leaves are powder blue in color. As an added bonus, the foliage turns gorgeous shades of coppery-bronze and in the fall. The silver seed heads are carried on showy plumes displayed in abundance from early fall to late winter. The silvery blue stems are very colorful and add to the overall interest of the plant.

Landscape Attributes

Jazz Little Bluestem is an herbaceous perennial grass with an upright spreading habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cut back to the ground in late winter before active growth resumes. It has no significant negative characteristics.

Jazz Little Bluestem is recommended for the following landscape applications;

2962 Jolly Lane
Rapid City, SD 57703

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

Jazz Little Bluestem will grow to be about 18 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
