Height: 22 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Star Cluster, Starflower

Group/Class: Glitterati Series

Description:

This selection produces large clusters of two-toned, red and white blooms, over dark green foliage; heat tolerant and low maintenance; excellent choice for pollinators; blooms throughout the season; perfect for cut flower arrangements.

Ornamental Features

Glitterati Red Star Star Flower features showy clusters of red star-shaped flowers with white centers at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its textured pointy leaves remain forest green in color throughout the season.

Landscape Attributes

Glitterati Red Star Star Flower is an herbaceous annual with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and can be pruned at anytime. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Glitterati Red Star Star Flower is recommended for the following landscape applications;

2962 Jolly Lane

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Glitterati Red Star Star Flower will grow to be about 22 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Glitterati Red Star Star Flower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
