JOLLY LANE GREENHOUSE

Hummelo Betony

Stachys monieri 'Hummelo'

Plant Height: 12 inches

Flower Height: 20 inches

Spread: 18 inches

Sunlight: ○

Hardiness Zone: 4

Other Names: Betony

Description:

This variety forms a large, rounded clump of attractive, narrow, textured leaves; sturdy spikes of lavender-rose flowers shoot up through the foliage from early to mid summer, making quite a display; a great addition to a sunny border

Ornamental Features

Hummelo Betony has masses of beautiful spikes of rose flowers with lavender overtones rising above the foliage from early to mid summer, which emerge from distinctive purple flower buds, and which are most effective when planted in groupings. Its glossy oval leaves remain emerald green in color throughout the year.

Landscape Attributes

Hummelo Betony is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Hummelo Betony is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Hummelo Betony will grow to be about 12 inches tall at maturity extending to 20 inches tall with the flowers, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Hummelo Betony is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
